

**CYCLO G6™**  
Glaucoma Laser System

**NEW!**

# G-Probe Illuminate™

## GLAUCOMA DEVICE

*Marking pen illustrating  
anterior margin of ciliary body  
as highlighted by transillumination*

Combined Transillumination and Laser Fiber  
for Targeted Transscleral CPC Powered by the  
CYCLO G6™ Glaucoma Laser System

- Targeted Cyclophotocoagulation
- Optimized probe placement and therapeutic outcome with built-in transillumination
- Single-Handed procedure

**IRIDEX**

The location of the ciliary body varies among quadrants of the eye, as well as between patients with glaucoma.<sup>1</sup> As such, ciliary body transillumination may provide optimal probe placement and enhanced therapeutic treatment outcomes.

The G-Probe Illuminate will combine illumination and laser fiber into a single probe offering transillumination capability in a single-handed procedure, without the need for an assistant, and freeing up the other hand for patient control and/or to operate additional devices.

## Glaucoma Therapy Device Options with the Cyclo G6 Laser System

DEVICE COMPARISON	G-PROBE	G-PROBE Illuminate	MP3 PROBE
Glaucoma Treatment Stage	Refractory	Refractory	Primary Open Angle
Repeatable Procedure	Yes	Yes	Yes
MicroPulse Technology	No	No	Yes
Transillumination	No	Yes	No
Destructive	Yes	Yes	No <sup>2,3</sup>
Therapy Location	Office & OR	Office & OR	Office & OR
CPT Code	66710	66710	66710
SmartProbe Technology	Laser Parameter Memory Enabled	Laser Parameter Memory Enabled	Laser Parameter Memory Enabled
Patented Probe Design	Wedge 	Wedge 	Curve 

“The G-Probe Illuminate has really helped me to deliver a targeted cyclophotocoagulation treatment in an easy-to-use probe. The visualization of the ciliary body and the surrounding working area is impressive allowing me to tailor the treatment to meet the needs of each of my patients.”
